

## Al at the edge: join the adventure

IT infrastructure at the edge that offers split-second algorithmic decision-making, as well as huge bandwidth, negligible latency and ironclad cybersecurity: it can seem like a hidden treasure that you and your fellow IT pros are racing to find. But this is exactly what we expect of today's edge installations. To implement and run edge deployments for deep learning (DL) and machine learning (ML) systems, you've got to be able to adapt — and Eaton can help. Want to find the treasure of future-ready edge IT? Here's your map.

We've hidden four artifacts from our new text-based game, Server Room of Doom — and you don't need to be a fedora-wearing archaeologist to find them.

Do you have the IT skills to escape the Server Room of Doom? Play now to find out: Eaton.com/Doom

## Supply chain: Powering accurate inventory

and on-time deliveries

## High density PDUs

feature toolless installation, switched outlets and a slim form factor that allows easy access to connected equipment. Rack enclosures

and cabinets

edge computing equipment but can be configured to prevent access from unauthorized personnel especially useful for remote sites without local IT professionals.

### Powering enhanced customer experiences

Retail:

# UPS with zerotouch operation

deployment, remote monitoring and control, allowing IT pros — not non-IT personnel — to keep an eye on real-time UPS status and battery levels via mobile app or web browser.

## Powering Al at the edge to help you save time, save money and avoid risk

infrastructure:
